Based on the information received by the general administration for residency and foreign affairs in the UAE, about the implementation of the online services to issuing (E-VISA) for GCC residents and their companions starting the 01 October 2015.

General points:

1. Main point of having an online prior visa for GCC residents and their companions is to ease and facilitate their arrival procedures and avoid waiting and crowd in the airport.

2. Procedures of having an online e-visa last from 24 hours up to 69 hours maximum, according to the security documents and clearances.

3. The validity and accuracy of the information is the passenger’s responsibility, and the airline company should match the information of the travel documents with the printed ones.

4. The implementation will be mandatory starting the 1st of October 2015, where there won’t be any visa issuance upon arrival.

Therefore, all Travel Service Providers inside and outside KSA are kindly requested to inform their clients of the importance of holding the origin of their resident permit (Iqama) in the GCC country they are staying at, when travelling to the UAE & obtain an e-visa through the website before arriving the UAE.
